

There's always something to celebrate...

Birthdays, Anniversaries, Awards, Oh My!

It seems as though there is always something new going on at Copresco. Here's a few items of interest.

As Seen On TV

Copresco was featured on Europe's Inkish TV last month. Copresco president Steve Johnson was interviewed in our plant, where he describes in detail our corporate philosophies, processes,

and workflows.

It's a quick view, and you'll learn more about just how we make your projects fly through our shop and out the door, on time, every time, with the highest of quality.

Happy Anniversaries

Speaking of amazing feats of longevity and of Copresco's website, our website celebrates 3 decades of service to customers this year.

Back in the 90's many websites were only a home page, and often contained only fluff.

We were determined to provide value and ease of use to our clients, and we continue to add to the hundreds of pages covering all topics of interest and assistance. Easy to use, easy to upload, easy to navigate is our mission.

A Decade of Dedication

Next month our manufacturing department's John Ruder celebrates 10 years with Copresco.

If you've ever asked if we can correct that last minute typo, drop in a new illustration, or add page numbering, it was probably John who saved the day for you!

Test Your Color Vision

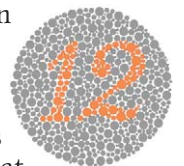

Not every item on Copresco's website is strictly about print. Our single most popular page is our Colorblindness Test. Check it out at

Do you and your spouse often disagree about color? These tests might just save your marriage! You can have fun sharing our colorblindness tests with co-workers and friends, but in fact color is serious business here at Copresco.

Assessing the limitations of your color acuity is an important step toward achieving satisfactory printed images. When your color needs to not just satisfactory, but stunning, call the company that wins awards for color printing. Call Copresco.

An amateur archaeologist was digging in the Negev Desert in Israel when he came upon an ancient tomb containing a mummy. After examining the perfect specimen, he called the curator of the most prestigious natural history museum. "I've just discovered a 3,000-year-old

mummy of a man who died of heart failure!" the excited young scientist exclaimed. "Bring him in," the skeptical curator replied. "We'll do the research and check it out." A week later, the amazed curator called the archaeologist. "You were right about the mummy's age and cause of death. How in the world did you know all that out in the field?" "Easy," the archaeologist replied. "There was a piece of paper in his hand that said, '10,000 shekels on Goliath.'"
